Career Objective

Full Stack Web Developer with 3+ years experience in building scalable web applications using PHP, Laravel, Vue.js and modern DevOps tools. Experienced in real-time systems with WebSocket, caching with Redis and containerized deployment with Docker & Nginx. Passionate about clean code, performance optimization and delivering high-quality client solutions.

Technical Skills

Programming Languages: **JavaScript & PHP**

Backend & APIs: **Laravel, WebSocket, RESTful APIs & MVC Architecture**

Frontend Development: **Vue.js, jQuery, Bootstrap, HTML5 & CSS3**

Database & Caching: **MySQL & Redis**

DevOps & Server Management: **Docker, Nginx, Linux & PM2**

Version Control & Tools: **Git, GitHub, Composer & npm**

Other Key Skills: **Cross-Browser Compatibility, Performance Optimization & Security Best Practices**

Work Experience

Enrich IT Solutions April 2023 – Present | **Full Stack Developer**

- Spearheaded the development and maintenance of multiple web applications tailored to client requirements, ensuring responsive design and cross-browser compatibility.
- Implemented WebSocket-based real-time features for several internal tools, enhancing communication efficiency by over 40%.
- Utilized Docker and Nginx for efficient deployment workflows, reducing environment mismatch issues across staging and production environments.
- Integrated Redis for cache optimization and queue handling in Laravel-based applications, improving system performance and reducing API response times by 60%.
- JavaScript, PHP, MySQL, Bootstrap, jQuery, Vue.js, Laravel, WebSocket, Docker, Redis and Nginx

Soft Creation Limited August 2022 – March 2023 | **Full Stack Developer**

- Developed and delivered bespoke web applications using Laravel and PHP aligned with diverse client specifications and business goals.
- Integrated jQuery-based dynamic form validation and Bootstrap UI enhancements across multiple client portals.
- Collaborated with clients from various industries to gather requirements and deploy tailored solutions, achieving high satisfaction ratings and repeat engagements.
- Contributed to project architecture planning, version control and debugging processes in a collaborative team environment.
- Bootstrap, JavaScript, jQuery, PHP and Laravel

Education

Southeast University

B.Sc. in Computer Science and Engineering | Ongoing

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Web Development, Database Systems, Computer Networks, Operating Systems and Software Engineering.

Rayilla Abdul Jabbar Polytechnic Institute in Manikganj

Diploma in Computer Technology | Completed: 2020

Relevant Coursework: Programming Fundamentals, Database Management Systems, Computer Architecture, Networking Basics, Web Application Development, Software Testing and System Analysis and Design.

Project Work

Sobkisubazar.com – E-commerce Platform

- Engineered a full-featured e-commerce platform to support product listing, shopping cart, customer orders and payment gateway integration. Implemented responsive front-end interfaces and robust back-end logic for scalable operations
- Technologies: PHP, Laravel, JavaScript, jQuery, Bootstrap and MySQL
- Link: <https://sobkisubazar.com>

armelectricaltd.co.uk – Electrical Services Website

- Developed a dynamic and responsive website for a UK-based electrical service company. Implemented service request forms, client testimonials and project showcases to enhance user engagement and lead generation. Integrated an admin dashboard for managing service categories, customer inquiries and content updates.
- Technologies: PHP, Laravel, JavaScript, Vue.js and MySQL
- Link: <https://armelectricaltd.co.uk>

Inventory Management System

- Built a responsive inventory management system to track product stock, supplier data and sales records. Designed intuitive dashboards and CRUD functionalities using Laravel and jQuery. Ensured role-based access control and generated dynamic reports for business analytics.
- Technologies: PHP, Laravel, JavaScript, jQuery, Bootstrap and MySQL
- Link: <https://sm.sobkisubazar.com>

Realtime Chat (Simple)

- Developed a real-time chat application with private and group messaging features using Laravel, Vue.js and WebSocket. Integrated event broadcasting and dynamic UI updates for seamless communication.
- Technologies: Laravel, Vue.js, JavaScript, Bootstrap and WebSocket
